

Renewable energy is available to us in various forms like the sun, wind and water and over the years man has developed technologies to harness all of these with various degrees of success. These can be used to live a life that is sustainable, eco friendly and also provides cost effective solutions in many areas. Global Eco Power is an enterprise dedicated to providing **Greener Solutions**

through a diversified portfolio of great products that harness clean renewable energy, which you can use with confidence.

We provide Energy efficient devices with After-Sales Services and training to the consumers. In future our portfolio will expand as more innovative products are available in the market, providing you with cutting edge solutions for your Eco-Friendly needs.

In a totally different experience you can now see Renewable Energy Products in a showroom and even online, via this website.

We will be working along with the State Nodal Agencies in promoting these Renewable Energy Products, located at Allahabad in U.P. This non metro city is the centre of its operations. It is also an initiative to reach markets in rural India, the villages and small towns of Uttar Pradesh and North East India.

Feel free to continue reading and explore the wide variety of solutions we provide.
